Motivation letter

I want to join your team, so that you can develop and use my skills and talents. I am studying Graphic Arts on University of Art in Poznań. I do not have any working experience, but I gained a large knowledge and skill set in my nine active years in scouting (inter alia as: guide, promotion manager, photojournalist).

I studied IT and psychology. I decided to change both for graphic arts, because I realized, that it's the hardest of my key interests, to learn it on my own.

My interests and competence in areas of visual arts, IT and psychology, lead me to the decision of specialization in front-end and web design.

Skills

Skills connected with visual arts:

- Visual sensitivity developed through studying Graphic Arts in University of Arts in Poznan
