About me

I am designer and software developer. Studying Graphic Arts at University of Art in Poznań, I consider programming as the field of design. I feel quite comfortable with JavaScript, Ruby and Python.

Due to my interests in graphic design, front-end development is my key area of concern in IT.

I gained a large knowledge and skill set in my nine active years in scouting (inter alia as: guide, promotion manager, photojournalist).

After hours I'm documentary photographer.

Working expierience

02.2017 - now: Designer/Developer in ContentForces:
- Implementing new design to legacy PHP applications (with jquery & bootstrap)
- Redesigning and implementing redesign of landing pages
- Implementing chatbot client (with RESTful API & Vue.js)
